

Environmental Policy

We believe that environmental responsibility is a moral imperative to protect the health of our planet and future generations yet to come. We recognize that the construction industry significantly impacts the environment and are committed to mitigating this impact by promoting sustainable and environmentally responsible practices wherever possible. We also understand that our clients have a role to play in promoting sustainability within the built environment. We work closely with you to develop responsible construction solutions whilst ensuring we meet your specific needs. Our team is trained to identify opportunities for sustainable construction practices and to implement them effectively at every opportunity. From MMC methods to sourcing materials and waste disposal, we work to ensure that our operations and partners are as environmentally friendly as possible.

- Atrium Garden Rooms will source and promote a product range to minimise the environmental impact of both production and distribution.
- Atrium Garden Rooms will strive to utilise modern, sustainable construction methods.
- Atrium Garden Rooms will comply with all relevant environmental legislation.
- Atrium Garden Rooms will minimise waste by evaluating operations and ensuring they are as efficient as possible.
- Atrium Garden Rooms will actively promote recycling both internally and amongst its customers and suppliers and encourage the adoption of similar principles.
- Atrium Garden Rooms accepts responsibility for the harmful effects its operations have on both the local and global environment and is committed to reducing them.
- Atrium Garden Rooms will measure its impact on the environment and set targets for ongoing improvement.
- Atrium Garden Rooms has implemented a training program for its staff to raise awareness of environmental issues and enlist their support in improving the company's performance.
